

"KURRENT KOMMENT"

GATHERED TOGETHER FOR FUTURE CAREFUL CONSIDERATION.

Opinions as to the Results of the Recent Total Vote and Opinion (Disturbances—"What Will the Hardest Be?")

TARIFF PICTURES.

In Connecticut last fall there were cast 165,000

votes. In the same state there are 331,061

persons who have deposits in savings banks—more than twice as many as the total number of voters. That is a picture of prosperity which will rapidly fade under the influence of Democratic Free-trade.

—New York Press.

The winter seems to have an uncommonly stiff backbone.

Hawaii, with its balmy air and perennial flowers, may yet be one of the great American winter resorts.

Will Hill be the Calhoun of the incoming "Jacksonian" Administration? No doubt Cleveland would like to hang him.

The Populists in Kansas talk about planting guns around the State House. They ought to be at home talking about planting crops.

Mr. Cleveland may not have a Tiger, but he is, in the shape of clamorous Mugwumps, a very fine sample of famished British lion.

If we assimilate Hawaii Mr. Cleveland will confer a great favor upon a long suffering people by making Skindint Holman Governor of the new territory and "Buck" Kilgore United States Marshal.

Uncle Sam should not attempt to stand up so straight as to lose his equilibrium. A narrow construction of the Monroe doctrine in the Hawaii case that would weaken the security of American commerce would be a violent distortion of that declaration.

Connecticut's report on savings banks comes along to emphasize that state's folly in giving its electoral vote to the Free-trade candidates. It shows that four out of every nine persons of all ages and conditions in the commonwealth have savings bank account. During 1902 the gain in total deposits was \$8,104,569; in number of depositors, 13,136; and in average amount due each depositor, \$9.18.

The St. John Telegraph declares in one column "that Canadians have no desire to insult the memory of their fathers by entering into a union with a Nation which drove them out and confiscated their property," and "that however honorable a thing it may be to be a citizen of the United States, to be a citizen of the British Empire is still more desirable," and in the next column rallies the Ministerial party over the exodus of over 1,000,000 Canadians to the United States. The Telegraph should retire to a quiet corner and think.

The country is left hopelessly in the dark as regard the motive which inspired the legislative genius who has introduced in the Minnesota House a bill making the manufacture, sale or use of the hoopstick a penal offense. It is possible that the question which confronts Minnesota is whether the crinoline or its feminine population must go. The land of Ignatius Donnelly is proverbial for its occasional windstorms, and should any of its fairer denizens be caught by one of these atmospheric outbreaks while clad in a crinoline the girl families in North Dakota and Manitoba would be instantly arrested and Minnesota be bereft of the redemptive portion of its population. From this point of view the bill against the hoopstick is all right, and its author a fair sighted statesman.

According to a precedent established in Louisville by the Employers' Liability Insurance Company, the life of a negro is worth only \$100, while that of a horse is placed at \$500. These are the sums awarded in the case of victims of the Louisville Electric Lighting Company.

The State Flower.
The Kentucky State Board of World's Fair Commissioners was called upon some days ago to designate what flower Kentucky preferred as her emblem at the World's Fair.

The Commissioners decided to leave the selection entirely to the Woman's Executive Committee, the who after a correspondence with Professor Gorman of the State College decided to adopt the Trumpet flower, (*Teonnia radicans*). The selection is quite satisfactory, and Kentuckians who contemplate going to Chicago will do well to select one of their native state. Kentucky is among the earliest states to make a decision in this matter.

The New Chart.
The Revision Committee, though composed of able gentlemen, does not appear to have before it the prospect of making very much of a reputation by the city and town charters which it has prepared, says *The Courier-Journal*. As it has little regard for the suggestions made by the towns themselves, though representatives appointed for the purpose, it had no right to expect its work to be received uncomplicatedly. The events may justify the wisdom of the commission, but at present there is a great deal of dissatisfaction over the proposed charts. This is the more pronounced because it is felt in some quarters that the commissioners failed to show proper consideration for the suggestions made by the joint committees of towns to be used to shelter the overflow when Aloyne drops into the multithread state.
